Media Maze

by lex via jill - Jungle Drum Newswire *Friday, Apr 20 2018, 2:41am* international / poetry / post

distorted mirrored images as in a maze reflect not what is real but contoured mirrored distortions according to their design

exaggerated at times and compressed at other times tho not one reflected image reflects what is real

trapped in a mirror maze people imagine they are what the contoured distortions reflect tho the distorted reflections are real according to their specific designs

without bearings or the real to guide people become trapped and live in false realities, the mirror makers are careful to reflect and distort with semblances of the real -pushing and pulling images this way and that according to their designs

and so people remain deceived/enslaved

all mazes have an escape and those that emerge in an un-distorted world are shocked by the reality/truth they see

so painful and disorientating is the unfamiliar real world and truth they scramble to re-enter the maze seeking the comfort of the group living in dreams and shared un-realities

it seems preferable to most to live shared lies rather than deal with solitary freedom/truth

some, very few, remain free outside and are able to see how the enslaving apparatus functions and the machinations of those that manufacture the mirrors and maze Underground Oz Poetry. http://ozpoetry.lingama.net/news/poem-844.html
